FyreCHOKE

CONDUIT MICRO FIRE COLLARS

Fyrechoke Conduit Micro Fire Collars are a compact sized retrofit product, designed to provide maximum protection against the spread of fire & smoke through walls, floors and ceilings where they are penetrated by plastic conduits.

Fyrechoke Conduit Micro Fire Collars are simple to install, using an integrated 'slide lock joint' mechanism, the two halves of the collar simply fit around the pipe and slide together. The collar is then fastened to the wall, floor or ceiling using integrated fixing lugs at the base of the collar.

Trafalgar's Fyrechoke fire collar range have been extensively tested to AS1530.4 and AS4072.1 in accordance with the Building Code of Australia. They have been installed on building sites throughout Australia and the world.

Thanks to the innovative two piece 'slide lock joint' mechanism, Fyrechoke two piece collars are ideal for use in tight, difficult to reach locations. Their stainless steel casing is supplied standard and is ideal for use in aggressive environments.

APPLICATION

Trafalgar Fyrechoke Conduit Micro Fire Collars are designed and tested for use in wall, floor and ceiling applications. They are fixed using screws or dynabolts depending on the fire barrier type.

Fyrechoke Conduit Micro Fire Collars are suitable for all types of conduits including electrical, data or mechanical services. They are suitable for flexible and rigid plastic conduits.

KEY FEATURES AND BENEFITS

-  Known and trusted brand - Benchmark Quality
-  Easily retrofit with integrated slide fastening
-  Cost effective— manufactured from recycled stainless steel
-  Fully tested to AS1530.4 & AS4072.1
-  Up to -/240/240 (barrier dependent)
-  Corrosion resistant stainless steel casing
-  Walls, floors & ceilings
